**"TURN RAW CSV FINANCIAL DATA INTO INVESTOR-
GRADE UNIT ECONOMICS IN SECONDS."**

PROBLEMS

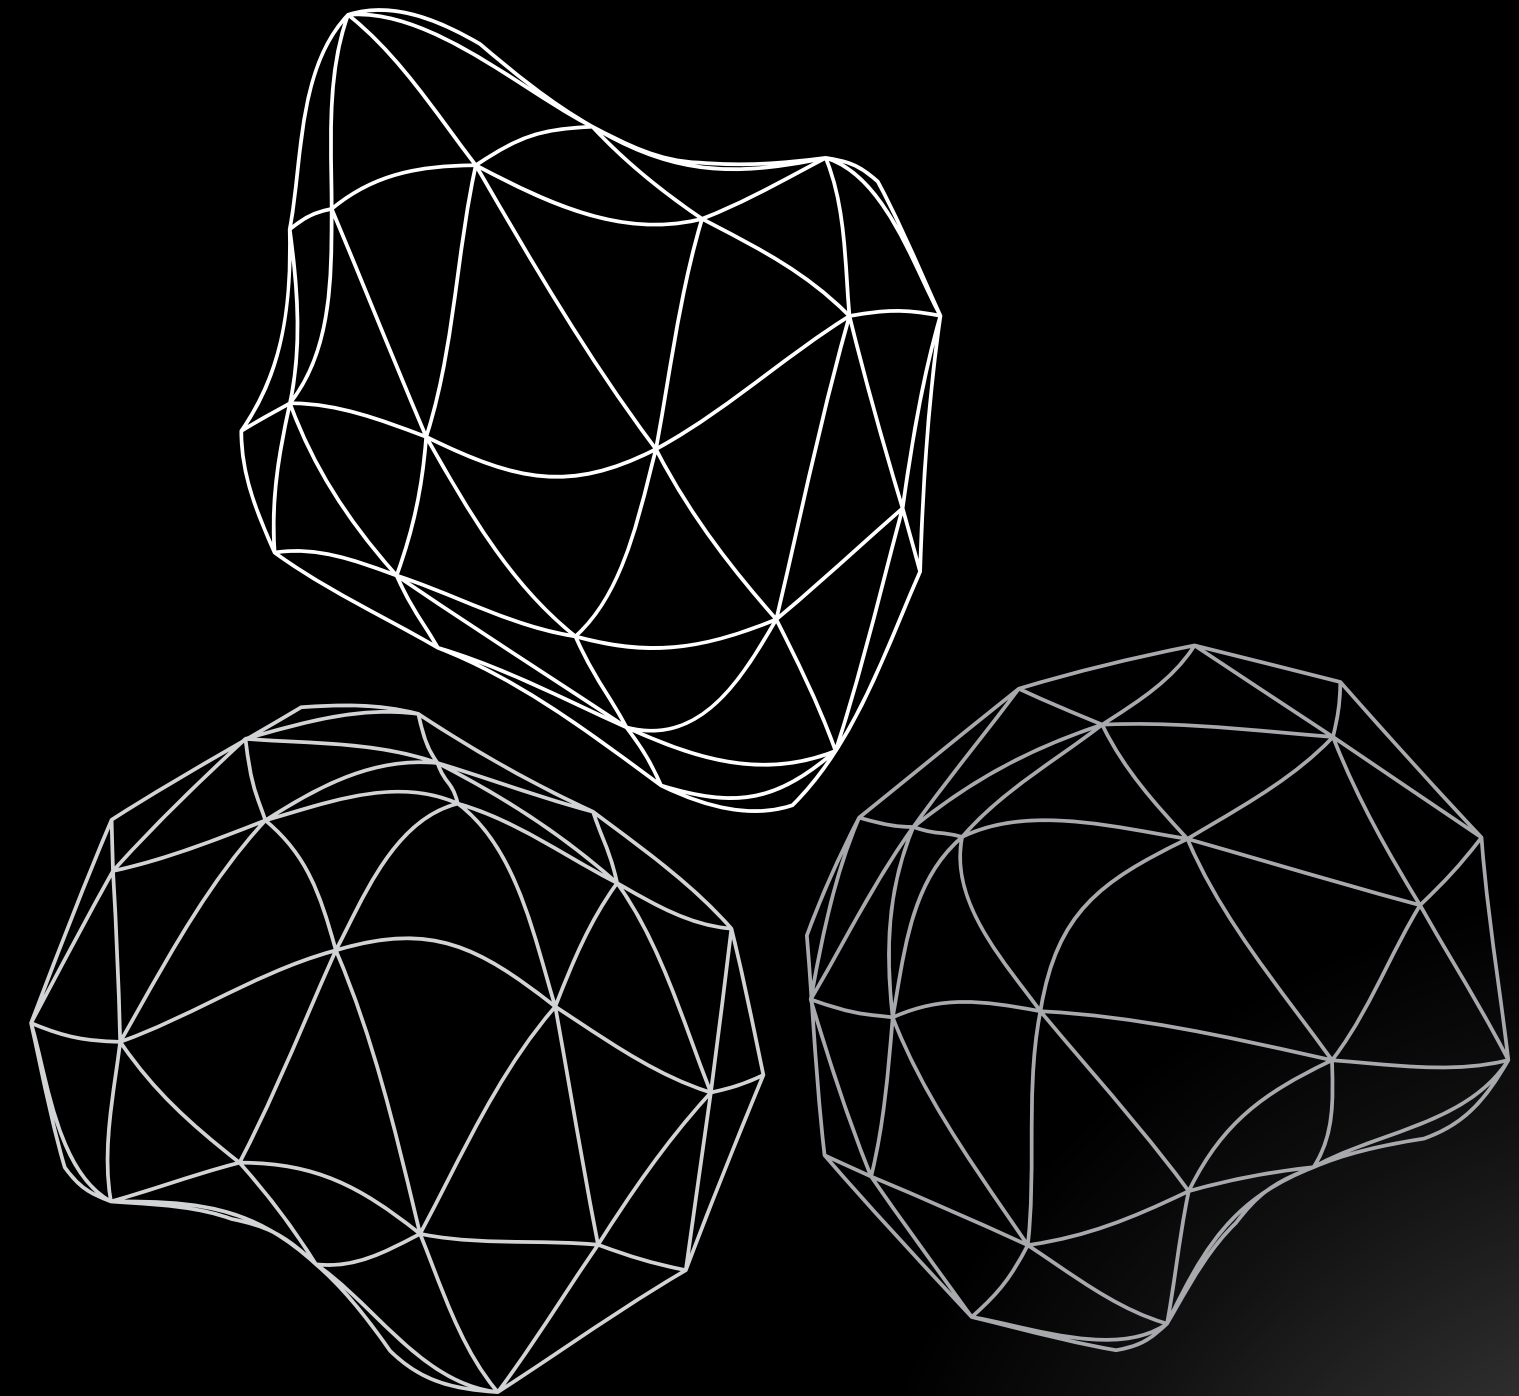

Why does this problem exist?

Many startup founders only monitor:

- Monthly Revenue
- Burn Rate
- Cash Balance

But they ignore crucial metrics like

- Customer Acquisition Cost (CAC)
- Lifetime Value (LTV)
- Churn Rate
- Gross Margin

➔ BUSINESS BECOMES UNSUSTAINABLE DESPITE GROWTH.

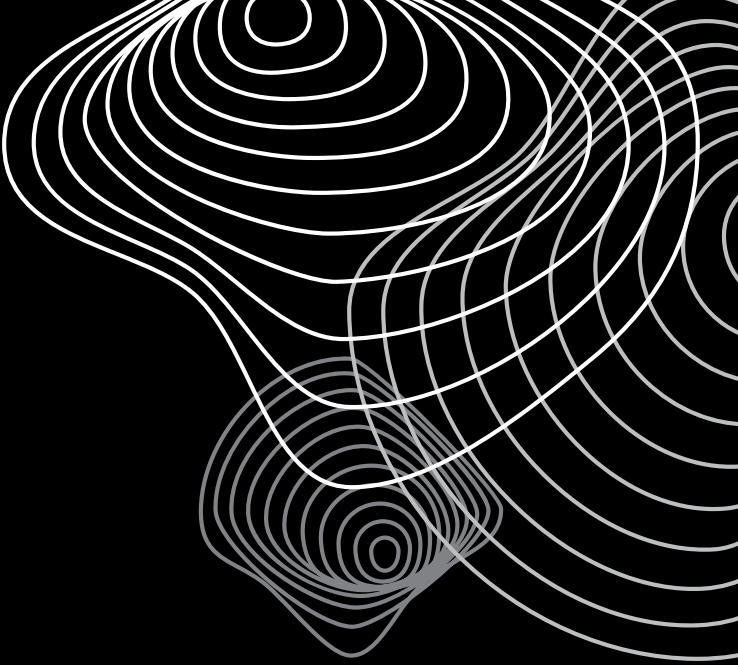

OUR SOLUTION

INTRODUCING VITALS.IO

UPLOAD ONE CSV FILE.

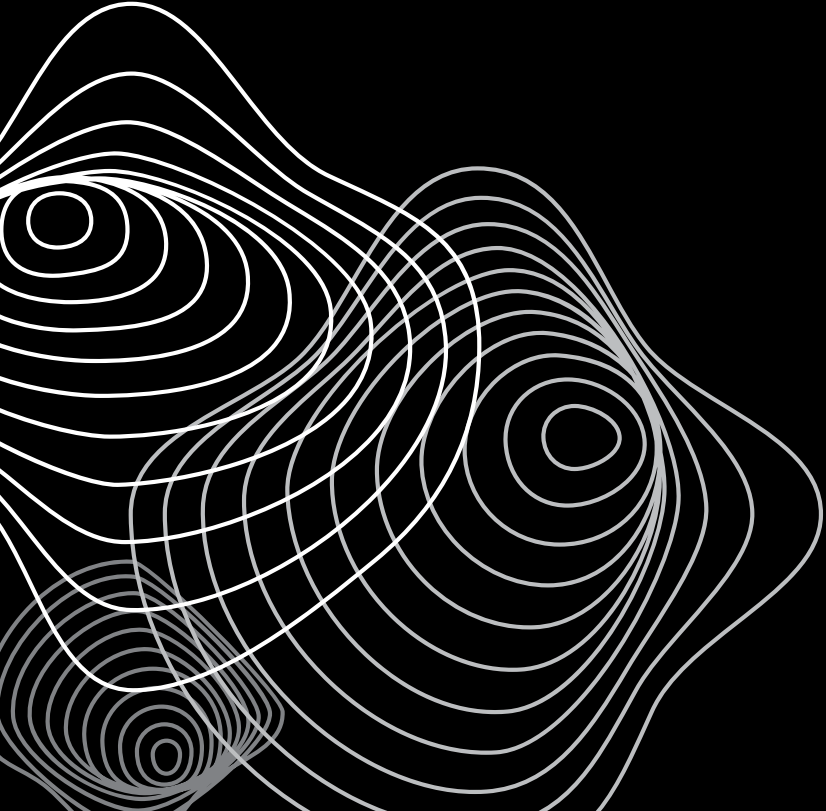

OUR SYSTEM AUTOMATICALLY CALCULATES

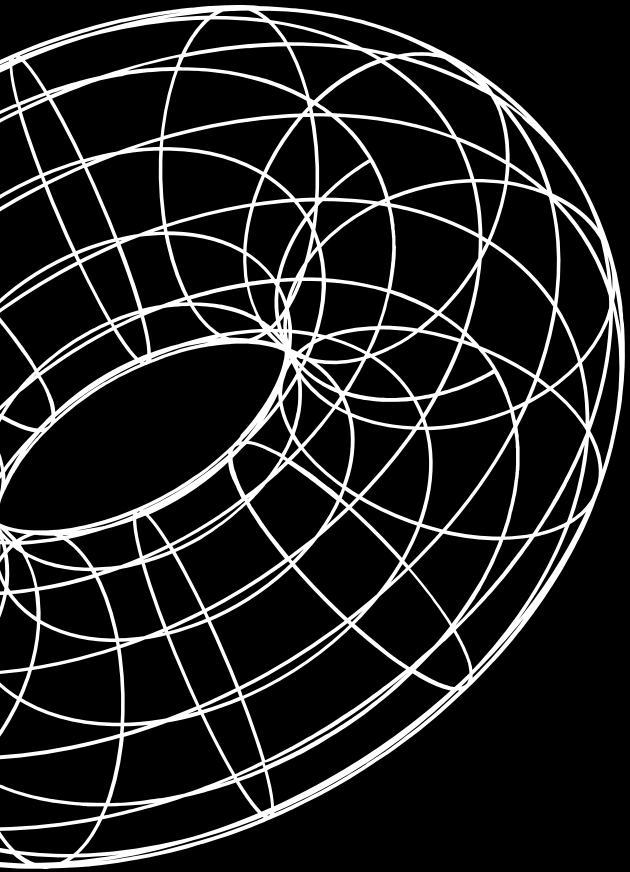

- ARPA
- GROSS MARGIN
- CAC
- LTV
- LTV:CAC RATIO
- PAYBACK PERIOD
- CHURN RATE
- STARTUP HEALTH SCORE (0-10)

VISION

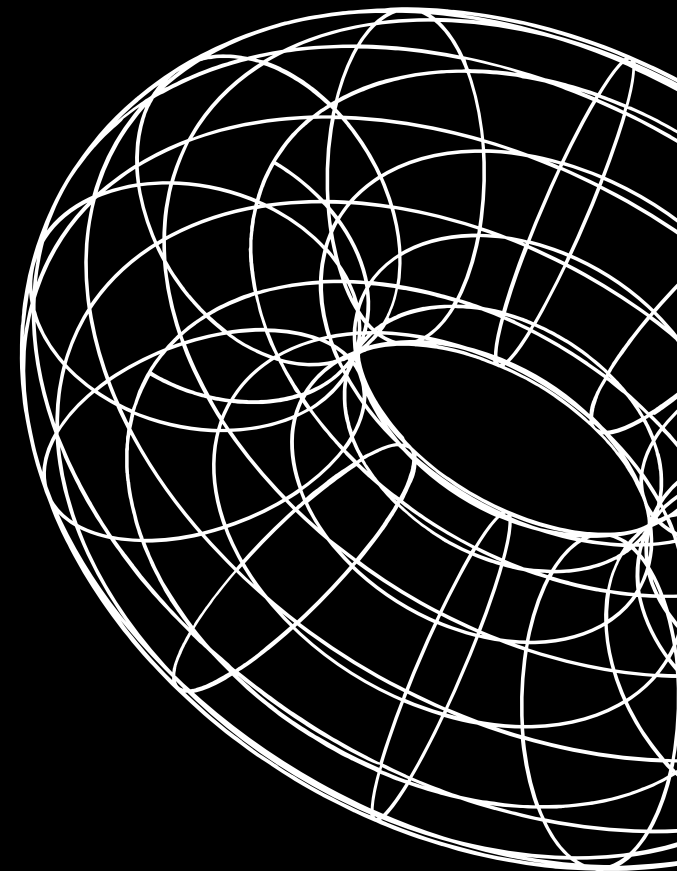

Democratizing Financial Intelligence

- **Zero Financial Blind Spots:** A future where no great product fails because of poor financial planning or miscalculated runway.
 - **Founder Empowerment:** To give every early-stage founder the exact same financial visibility and analytical power as a top-tier venture capitalist.
 - **The Global Standard:** To become the default financial command center for every new startup from day one.
- 

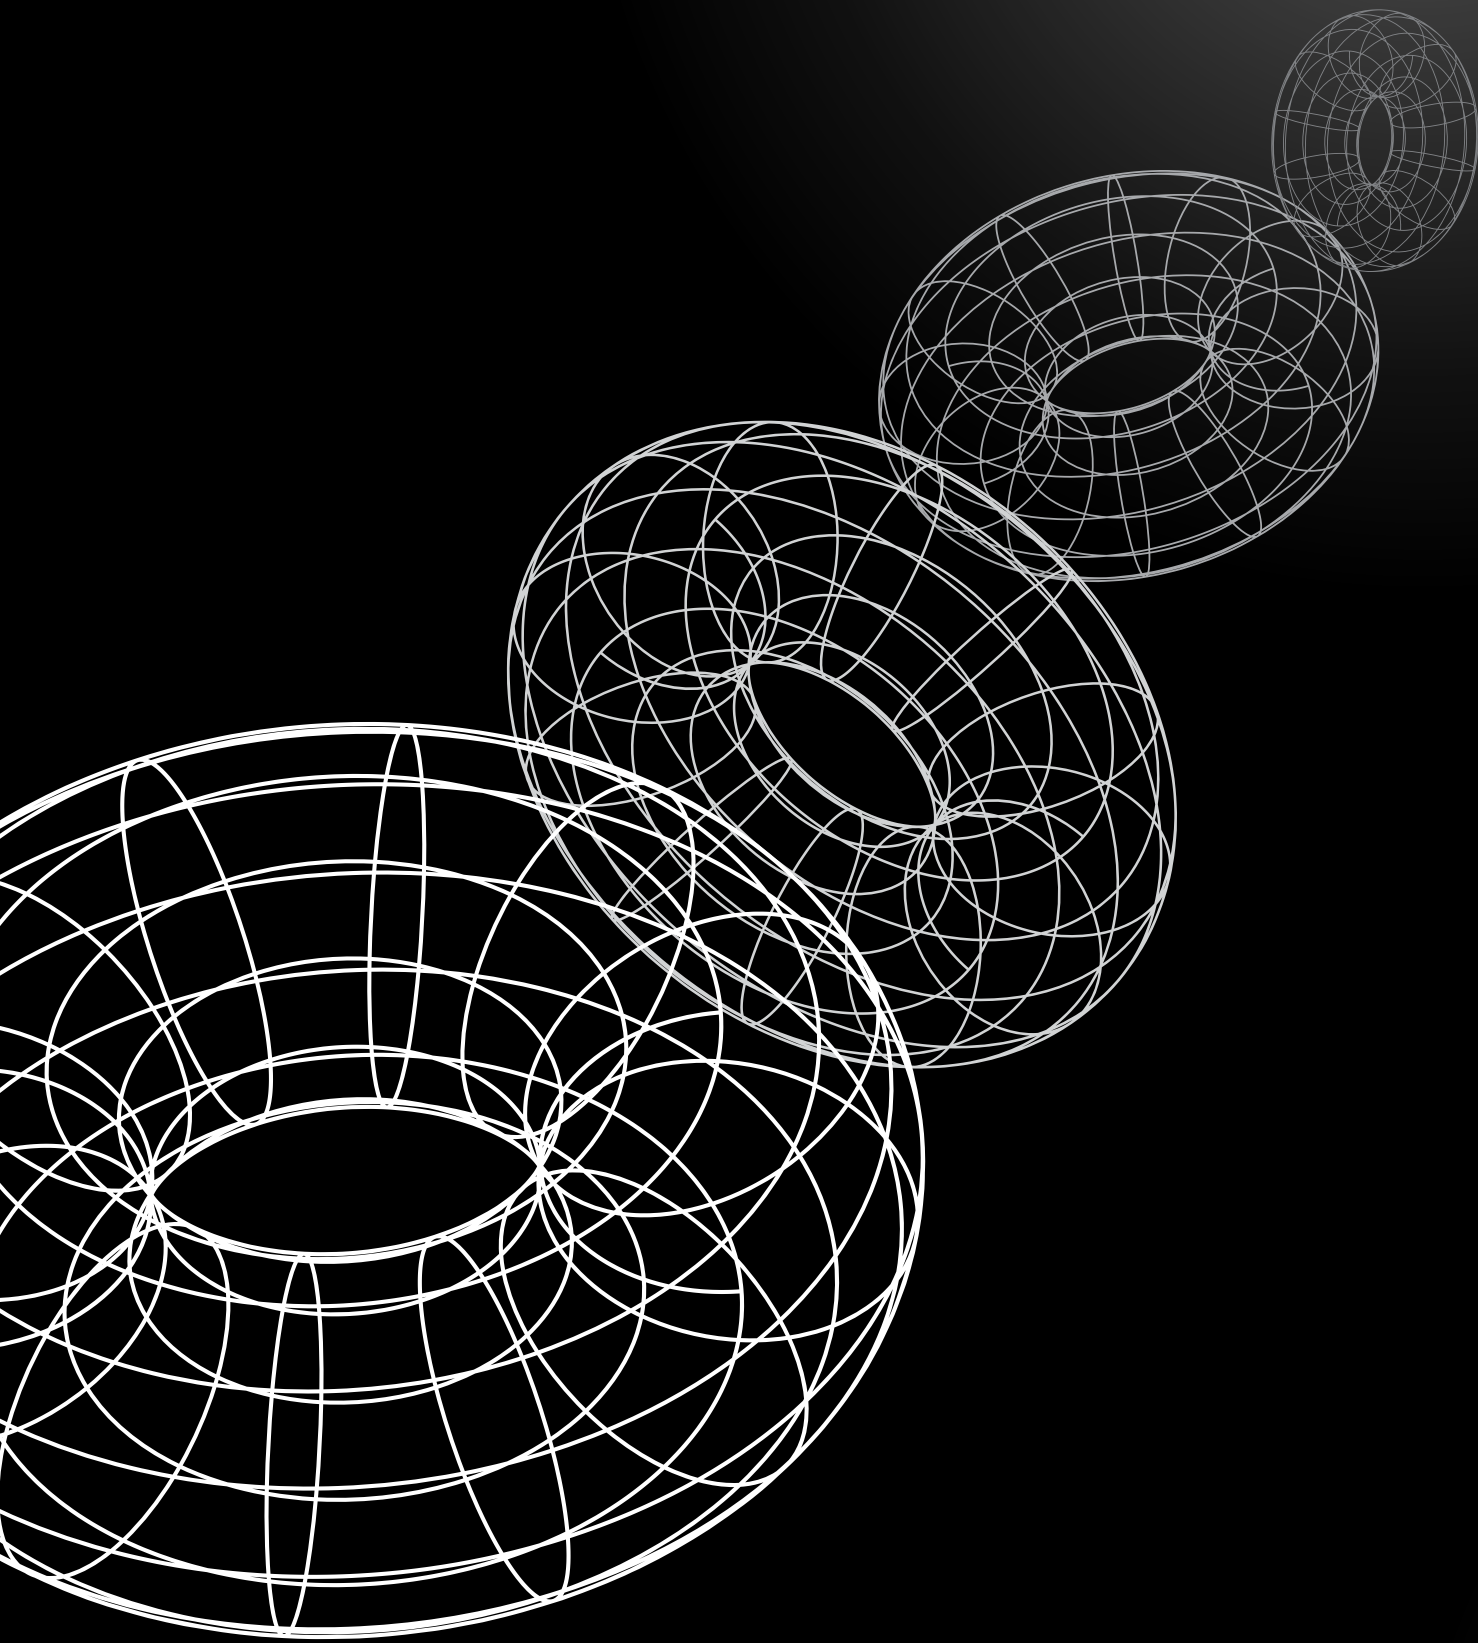

MISSION

- **Clarity Over Chaos:** Instantly translate raw startup data into investor-ready financial metrics.
- **Actionable Insights:** Use interactive scenario planning to show founders exactly how business decisions impact their future.
- **Sustainable Growth:** Help startups build profitable business models and accurately forecast their cash runway.
